FROM THE ORGANIZERS

This year's Sankalp Africa Summit 2022 was an event like no other. This was Sankalp's first ever hybrid event in our 13 year history. When designing the event, we set out to drive as much engagement and value to the Sankalp community as possible. Given the uniqueness of our community, we couldn't simply stream in-person content to a live audience. We therefore innovated on how we wanted to structure our hybrid event, and we decided to create separate programming for virtual attendees and for in-person attendees, so that everyone, no matter how they were able to join, was able to have an amazing Sankalp experience.

We hosted three days of virtual convening with more than 35 digital sessions, and one day of in-person convening. During our in-person event day, we experimented with an unconference style agenda where 85% of the content was contributed and delivered by our attendees themselves in informal 'Discussion Zones.' These zones had no stages, microphones, or screens – just good ol' fashion face to face sharing of ideas, challenges, and inspirations for building our entrepreneurial ecosystem. Delivering this two-in-one programming structure was one of the most challenging for the Sankalp team, but it was by far the most satisfying event I've personally ever been a part of.

For many of us, the Sankalp Africa Summit 2020 was the last big in-person event any of us participated in, before we receded to our homes and computers for two years of Covid quarantine. I could not be more honored that the 2022 Africa Summit was yet again the trend setter, and one of the first big events hosted for the region and the industry. Though we were able to safely convene only about 300 people in-person, the smiles, the conversations, the coffee lines, and the meetings under the sausage tree were a welcome change from Zoom meetings in yoga pants!

The pandemic put our regional expansion plan on hold for the last two years, but that is back on our radar now. Stay tuned as Sankalp expands to West Africa later this year.

Thank you to all of you, who once again put your faith in Sankalp that we could convene safely and continue to help provide critical linkages for the ecosystem during these tumultuous times. It is our privilege to support and build this incredible community year on year.

Until we see you again, stay safe and stay healthy!

Warmly,

Arielle Molino,
Sankalp Africa Lead

ABOUT SANKALP

Launched in 2014, the annual Sankalp Africa Summit has grown to be the largest convening of its type in the region. It supports the regional entrepreneurship ecosystem and builds channels for learning and replication between emerging markets in the Global South. Entrepreneurs remain at the core of Sankalp Forum's mission, and each year through the Sankalp Awards, we source, screen, and support high potential enterprises in their capital raising and with global exposure.

Due to the ongoing pandemic, the Sankalp Africa Summit 2022 was unconventionally hybrid with three days of virtual programming from March 1st to 3rd and one day of in-person programming on March 4th. We engaged 1,747 participants from the Americas, Europe, Asia, Australia, and Africa. Due to increased virtual access, we saw a huge rise in engagement from across the African continent. Through both our virtual and in-person programming, Sankalp reached an audience from 95 countries globally, 39 of which are African.

We had an incredibly diverse representation of stakeholders including entrepreneurs, investors, philanthropists, academic institutions, entrepreneur support organisations, and DFIs all of whom represent every impact sector. Our event platform underpinned both virtual and in-person attendees, and anyone who was attending could see who else was participating, and whether they were joining virtually or physically. Networking has never been so easy, and our attendees set over 1,500 meetings! Virtual attendees could connect via digital meeting rooms, and in-person attendees booked one of 15 meeting tables we dedicated for networking

Sankalp is inherently a collaborative effort, and it is through your support that we are able to grow Sankalp as a platform, for and by the impact entrepreneurship community.

ATTENDEE PROFILES

GEOGRAPHIC REACH

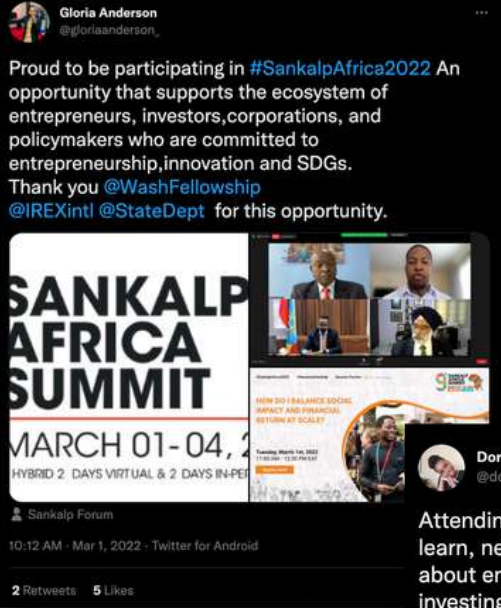

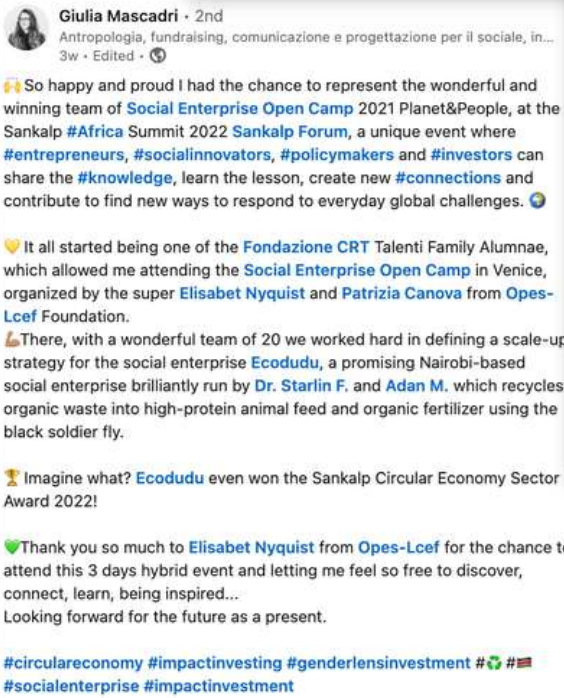

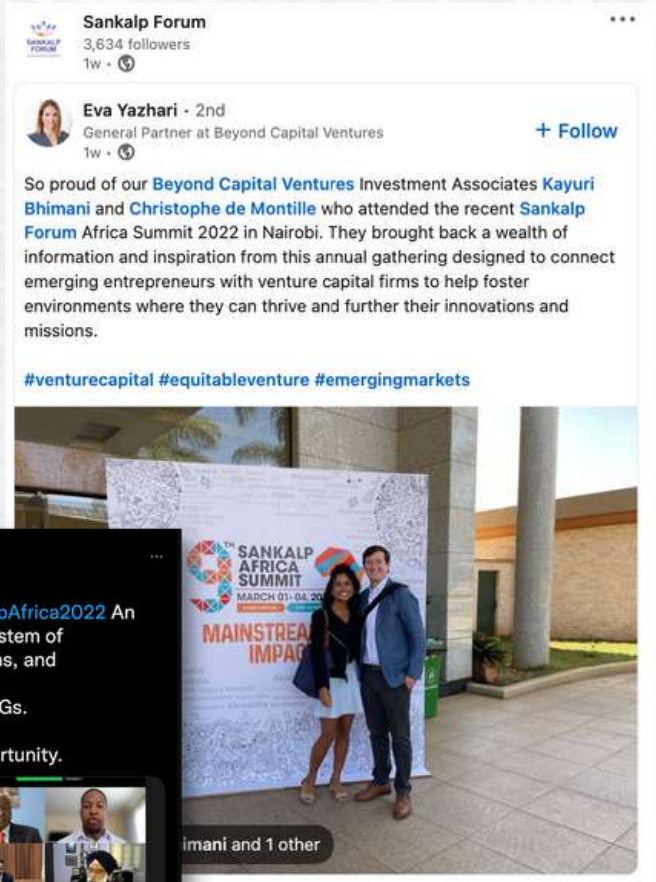

This year, Sankalp reached an audience from 95 countries around the globe, through both our virtual and in-Person programming. The attendees were from diverse sectors working on creating social impact in their respective communities. We received the bulk of our participants from Kenya, the United States of America, Uganda, India, the United Kingdom, Rwanda, the Netherlands, Nigeria, South Africa, and many more countries.

Additionally, we registered a few countries that we saw for the first time attend the Africa Summit such as Chile, Ecuador, Eritrea, Gabon, Gambia and Mali.

DIGITAL REACH

Throughout the period of the Summit, we reached 47 million impressions across our social media platforms, and 815,737 views of live-streamed sessions on Facebook.

There is no better to be discussing solutions, making awesome friends, and meeting the future of entrepreneurship [than] at Sankalp.

- Carolyne Kirabo, M-Kyala Ventures

I definitely hope I can come next year because it was really amazing to meet the sector in real life because I joined this industry a half a year before Covid. So, I had never been to such a conference in real life. Already now from meeting the people face-to-face that I've been interacting with online for the last two years is a completely different world.

- Roald Klumpenaar, BOPinc

End of the day, none of us can actually do things by ourselves, but as a collective, we can do, and achieve great things. I feel this is what Sankalp does. It brings people together, it brings together different minds from different countries.

- Vandana Thottoli, SNV & DFCD

The Sankalp [Awards] was a challenge like no other before because you're pitching to real investors, you're not just pitching to a panel of judges. So that was really a different experience, you're getting questions and feedback from investors.

- Ann Nderitu, Switlab

This is the second time we're participating [in Sankalp]. We participated in the previous one, which was virtual. We were one of the finalists at the pitch. We were so lucky that in that room there were female investors who heard our story and actually last year, we just closed our SAFE, thanks to a couple of investors investors we met at Sankap. So this year, we came back to share the story. To make sure that people do understand that these spaces do exist and that you can actually benefit from that.

- Diana Sierra, BeGirl

I think it is a must-attend forum. It definitely opened up a lot of doors, it will give you a platform to start a discussion, which is very important so you can move to the next stage and learn a lot from the processes. The team is super supportive, which I've not seen in many other places or other forums.

- Mavji Versani, Vintz Plastics

SANKALP ECOSYSTEM AWARD, 1ST RUNNER UP

Cropnuts, Kenya

Sector: Agriculture

Website : <https://cropnuts.com/>

Crop Nutrition Laboratory Services (Cropnuts) is an agricultural, food safety, and environmental laboratory and agronomy advisory service company that helps farmers achieve long-term profitability by rebuilding and restoring soil fertility and making climate smart agronomic advisory services more accessible to all farmers.

SANKALP ECOSYSTEM AWARD, 2ND RUNNER UP

Steamledge, Nigeria

Sector: Education

Website: <https://steamledge.com/>

Steamledge provides Primary and Secondary School learners early and affordable access to Technology skills that match the needs of the changing workforce through a Hybrid Online Interactive Platform, School Partnership engagements and Independent TAP Learning Centers. [Learn more here.](#)

2ND PLACE

Rural Farmers Hub, Nigeria

Website: www.ruralfarmershub.com

Rural Farmers Hub (RFH) is a business innovation leveraging ICT (mobile phones & big data) that supports farmers, corporates and industries to make better agribusiness decisions through data-driven and precision advisory services on improving crop yield and market linkages. It was founded in 2018 by Segun Adegun, a development professional, and Gabriel Eze, a tech professional and commercial farmer.

3RD PLACE

Agrotech+, Kenya

Website: <https://agrotekplus.com/>

Agrotech+ is a digital lending platform that provides farmers access to credit based on alternative credit scoring models as well as agriculture-information, micro-insurance, and advisory services. By doing this Agrotech+ protects smallholder farmers against vulnerabilities of climate change through technology.

THE AGENDA

#SankalpAfrica2022

SANKALP AFRICA 2022 THEME: MAINSTREAMING IMPACT

As we continue to navigate this pandemic that has transformed our lives across the world, the imperative for business, corporations, governments & individuals to pivot to an impact-driven economy has never been more urgent. Leading with an impact focus is now not a “good to do thing” or an afterthought but is smart economics that can solve the world’s most pressing challenges.

The current pandemic has uncovered the inequities in Africa whose vulnerable populations, and urban megacities have struggled with the basics of access to healthcare, food, water, jobs, migration etc. Rural populations have struggled with the connectivity and the increasing digital divide that has thrown millions of children out of formal education (and unfortunately more girls). Millions of women across the world have disproportionately lost jobs & livelihoods and have been victims of violence. While the UN SDG’s have given us the global grammar to a collective pathway to change, to action them we need scalable and sustainable solutions, and mainstream capital to change the direction of their investments. The capital pivot requires a shift from investing in entrepreneurs whose goals are “cheaper, faster, more”, towards entrepreneurs who are purpose-driven to be inclusive and focused on clean air, clean water, clean land. Impact investing now needs to be mainstream, rather than niche portfolios in the development sector.

Every year at Sankalp, we convene for-profit entrepreneurs that are driven by purpose, and the ecosystem needed to support them to thrive. We convene to solve for & with the emerging 3 billion in the Global South around the challenges of the climate crisis, smallholder farmers, sustainable agriculture, financial inclusion, livelihoods, water, health & sanitation. Across all of our thematic areas, we look at the role of technology, capital & women as cross-cutting themes. This year we also explore nature-based solutions, as well as circularity across different verticals.

We have an opportunity for a smart economic recovery across Africa that can lead to a sustainable and equitable world. Our call to action at Sankalp this year is for investors, business and governments across the world to lead with impact.

AGENDA OVERVIEW

The Sankalp Summit's agenda is curated with the entrepreneurship ecosystem in mind and is designed to help all participants derive maximum benefit from the wealth of knowledge, capital, and networks at Sankalp. In this regard, the Sankalp Africa Summit 2022 featured over 50 informal and formal sessions, facilitated by 191 speakers from the social impact community including thought leaders, industry experts and entrepreneurs. Our aim is to be inclusive and participatory – and across our sessions, we included entrepreneurs as key speakers as well as beneficiaries to bring together the complete discussion of Sankalp.

Some of the sessions across various formats and sectors included:

IMPACT INVESTING

Virtual Sessions

- Opening Plenary | Impact Investing: Out of the margins and into the mainstream
- How do I balance social impact and financial return at scale?
- How angel investing helps close early-stage financing gap for high growth ventures in Africa
- Beyond Urban Cities | Investing in Kenya's Future Green Growth Hubs
- Catalyzing Exports from Africa Through Assistive and Flexible Capital
- Blended Finance: Scaling Investment in Sustainable Businesses in the Global South | Invite Only
- Entrepreneur to Investor Deal Room
- Entrepreneur Slumber Party | Pitches from Seed Stage Entrepreneurs
- Entrepreneur Slumber Party | Pitches from Early Growth Stage Entrepreneurs

In-Person Discussion Zones

- Venture Studios | A Novel Model to Turn Impactful Ideas into Venture-backable Businesses
- Transaction Advisory Role in Access to Finance
- DeveloPPP | Where business meets development

GENDER & INVESTING IN WOMEN

Virtual Sessions

- Info Session | Women Empowerment Awards 2022
- Gender Lens Investing | Uncovering opportunities for Kenya
- Women's economic empowerment through a low-carbon recovery
- De-risking Women Farmers through Innovative Insurance
- Female Founders' Showcase
- #WomenAtSankalp

In-Person Discussion Zones

- How can we catalyze Gender Lens Investing in Africa | Moving from the talk & hype to actual funding

CLIMATE, ENERGY, & THE ENVIRONMENT

Virtual Sessions

- Main Stage Plenary | Getting to "Nature Positive" through Local Communities
- Innovation for climate change adaption: Seizing opportunities for business development and financing
- Catalyzing Solar Markets in Africa through Blended Finance
- Harnessing the Utilities 2.0 Model for Innovative Energy Solutions
- Leveraging 10,000 MW of Geothermal for Economic Empowerment
- DFCD : Developing green climate solutions towards investment-readiness

In-Person Discussion Zones

- GIZ - PrivABoo Meet & Greet Networking Breakfast

AGRICULTURE & NUTRITION

Virtual Sessions

- Disruptive Insurtech | What Next for Africa?
- The Silver Lining | Opportunities & Lessons for Africa's Agri & Food Systems

In-Person Discussion Zones

- O-Farms: Mainstreaming circular agribusiness in East Africa
- Inclusive Insurance in Africa: Scaling Protection for the Missing Middle

FINANCIAL INCLUSION

Virtual Sessions

- The Role of Cryptocurrency in Bringing Down Cross-border Payment Costs for Digital Workers in Africa
- Fintech Hackathon Virtual Demo - Innovative & Sustainable Fintech Solutions that will drive the future of Africa

ENTREPRENEURSHIP AND ENTERPRISE SUPPORT

Virtual Sessions

- Financial Management Support for Young Entrepreneurs
- Business opportunities in climate change adaptation
- Why Venture Capital Doesn't Work | A Masterclass on Funding Options for Your Startup
- Masterclass | The Need-To-Knows of Due Diligence
- Flip to win | How to ACE all your investor conversations
- Enabling Policies and Strategies for The Accelerated Growth of Small and Growing Businesses
- Understanding the full set of needs of (fast growing) African companies
- Founders Anxiety? Workplace Wellbeing? Mental Health and Wellbeing for Founders and Start-ups
- What Works. SMEs, Tech & Job Creation

In-Person Discussion Zones

- Tengeneza na Somo Production Facility
- Challenge Funds - The KCJF perspective
- Scaling SMEs to revolutionize availability and affordability of Good Food
- Investing in scale: How one funder goes beyond capital to deliver scale to solve complex issues
- What technical skills does the market need? How can learning institutions train the right talent?

HEALTHCARE, WATER, AND SANITATION

Virtual Sessions

- Better Public Private Partnerships in Health: What Does it Take?
- Beyond Beds and Buildings: Preventing Africa's Continental Drift
- Actionable Insights for Inclusive Healthcare in Africa | By Invitation Only

YOUTH AND EMPLOYMENT

Virtual Sessions

- Main Plenary | Youth Leading from the Front: How Africa's Next Generation is Driving Change
- Building the Next Generation of Responsible Businesses and Leaders through Decent Work

VIRTUAL PROGRAMMING HIGHLIGHTS

#SankalpAfrica2022

MAIN PLENARY DISCUSSIONS

IMPACT INVESTING: OUT OF THE MARGINS AND INTO THE MAINSTREAM

Africa is not in the business of building back better. It is in the business of building. The opportunity is to build from a lower base, draw from global experiences and adopt new business models to deliver impact.

- ADRIAN SAVILLE, Investment Specialist, Genera Capital & Director, Centre for African Management & Markets, GIBS

We are all trying to build an inclusive, sustainable and equitable world. It calls for a need to implement strategies with a redefined approach building the discourse around 3 broad themes: interconnectedness over individualism, transformational change over incrementalism, and making change happen versus waiting for things to happen. We need to increase interdependence as any one thing going out of balance will create a ripple effect in the ecosystem. In the journey to creating large-scale impact, we need to realize incremental change will only impact a few lives as opposed to thinking of transformational impact where everyone pulls in to help effect more change. We need to see opportunities rather than challenges and think of what the future can be and not what it is. We need to all take ownership of action.

Mainstream investing has 2 dimensions: risks and returns while impact investing has 3 dimensions: risk, returns, and social impact. The impact derived from impact investing is multifaceted and there is a need to understand the difference between inputs, outputs, and impact. The parameters for any Investing don't necessarily state its impact but outputs. It is paramount to shift our mindset to gauge the following when investing: intentionality (Social and financial returns), purpose and focus of measuring impact, and patience with investment.

Entrepreneurs can use these 3 lenses as a guide to analyzing an investor. Impact investing is not a zero-sum game once we understand that financial returns and social returns aren't mutually exclusive. They both offer a degree of opportunities and risks and have a point of convergence and balance. Businesses established on old paradigms should iterate and try to reinvent themselves. It is quite imperative to influence how capital allocators think whereby they first find the problem and then be intentional about solving the problem whilst generating impact and financial returns.

Mainstreaming impact investing is a phenomenon that is currently being continuously considered by investors especially due to covid 19. It has pushed investors to be more socially conscious of their impact regardless of whether they see themselves as impact investors as they have been confronted with the risks of ignoring the non-financial effects of their businesses.

Impact-focused investments are diverse and they seek to address specific problems, imbalances, or inequality until there is a level playing field. There is room for growth for impact investing more so in Africa. It is a young, fast-growing base continent and can bring new business models with impact. Entrepreneurs have to learn how to borrow and refine business models and not necessarily invent new models. Incentivizing Impact investment also needs fund allocators to think about impact lens investing and shifting mindsets to long-term views as opposed to outsized returns in a short term. Less money should be directed to short-term results mentality.

It is better to have a broader perspective by looking through an impact investing lens as it provides more focus, opportunities, and risk mitigations.

YOUTH LEADING FROM THE FRONT: HOW AFRICA'S NEXT GENERATION IS DRIVING CHANGE

A self-reliant, self-sufficient Africa is possible if we inculcate and imbibe a futuristic mindset into the young people of today and charge them to find African solutions to African problems.

- CHINEYENWA OKORO ONU, Founder, Waste or Create Hub

Africa has some of the youngest populations in the world and this couples it with several opportunities and challenges. Some countries are still underdeveloped resulting in challenges like having limited access to education for the youth, unemployment, unfavorable public policies, Stereotypes of youth with disabilities, identity challenges, and gender inequality. Even so, we do have opportunities that can stem out of the challenges including, a ready workforce, Arid lands, new infrastructure, collaboration as well an increased digital space Youth need to utilize their challenges as opportunities. We need to understand more about the challenges faced as well as build on what pioneers have done to be able to wield a solution for them. A change in our narratives, attitudes, and stereotypes of stigma, especially for the youth with disabilities will help create opportunities for other individuals and increase self-esteem for the marginalized to enter the es platforms for change.

The youth require more capacity building. It is important to shape young adults as they start making choices about their careers. Life skills make them intentional about their lives, goals, and aspirations which leads to having more informed choices, productive decisions, and a higher employability rate. It sparks innovativeness in bringing change and challenging the status quo.

The youth need to start looking at the root cause of the problems they are facing and identify how they are part of those problems. Environmental sustainability is fundamental in the businesses we operate in and entrepreneurs need to transform how they think and see, in general, behavioral change habits. Eco-entrepreneurship will in turn leads to the creation of jobs, empowerment of the community, improvement in livelihoods, and growth and development of the continent. We need to start thinking of how we can solve problems that we have envisioned might occur. An intentional purpose is to find solutions that are yet to be identified by picking what is viable and embedding that into the solutions one wants to provide for the community.

A paradigm shift in Education setup across Africa is also a factor that would bring change to many of the problems. Vocational skills do have value, lead to success and drive successful business enterprises as much as the rigid formal education tuned to create doctors and lawyers. A lot of young people's interests are equally changing, especially with new technology innovations. This brings new parity in life where the youth want flexibility, professions that have intersections instead of traditional jobs. Championing this needs an overhauling of the education system as we collaborate with governments and have inclusive policies.

There is a need to ensure diversity in our skillset in the different industries to drive the change we want to see in the continent. The youth need to take ownership of their change.

GETTING TO "NATURE POSITIVE" THROUGH LOCAL COMMUNITIES

We need to recognize forests as part of development like agriculture. This will help reduce biodiversity loss.

- CHARLES MESHAK, Executive Director, Tanzania Forest Conservation Group

Nature is declining at an unprecedented rate, oftentimes climate change is limited to industry, pollution, and people however, climate change and biodiversity are inextricably linked, and the more we focus on preservations of Africa's diversity the more resilient the natural ecosystems will be. Nature positive concept /approach seeks to enhance the resilience of communities and nature to help reverse the loss of nature to ensure the 3 measurable temporal objectives: Net Zero by 2020, Net positive by 2030, and full recovery by 2050. There are current initiatives that help in restoring biodiversity, promoting the ecosystems, and carbon credits like Red plus and Restoration of rangelands initiative. They provide opportunities to develop methodologies and approaches to measure the activities of carbon sequestration while monetizing it.

However, the conversion of forest habitat to non-forest activities -such as Agriculture threatens biodiversity. The population in the next 10 yrs. is set to double meaning more food will be required. We need to develop smart climate agriculture and technologies by 2040 to help in the restoration of natural forests as conversion to Agricultural farms results in 2 major shortcomings, Ownership of land by individuals and reduction in economic value. We thus need to recognize forestry as part of the development of agriculture and a trade-off or balance should be considered.

We need to harmonize policies in the different spaces of discussions of Climate-smart solutions by government, silos, and agencies to ensure the achievement of the Paris agreements. There are also financial opportunities to help provide an enabling environment for individuals to help drive and effect change like DFCD, Public Funds, equity, and grants. WWF and other partners are also trying to create smaller grants which are community-centered.

Smart solutions and smart farming opportunities need to also be included for example insect protein and the use of drought-resistant crops to help sustain communities while also driving businesses. Support of the private sector and NGOs have also been key to the development of most ecosystems, especially through organic farming, certification of crops, and support of the value chain. The banking institutions as a key financiers should also put conditions on borrowers for example exclude activities that damage ecosystems or pollute and exploit nature to help raise understanding between nature and development.

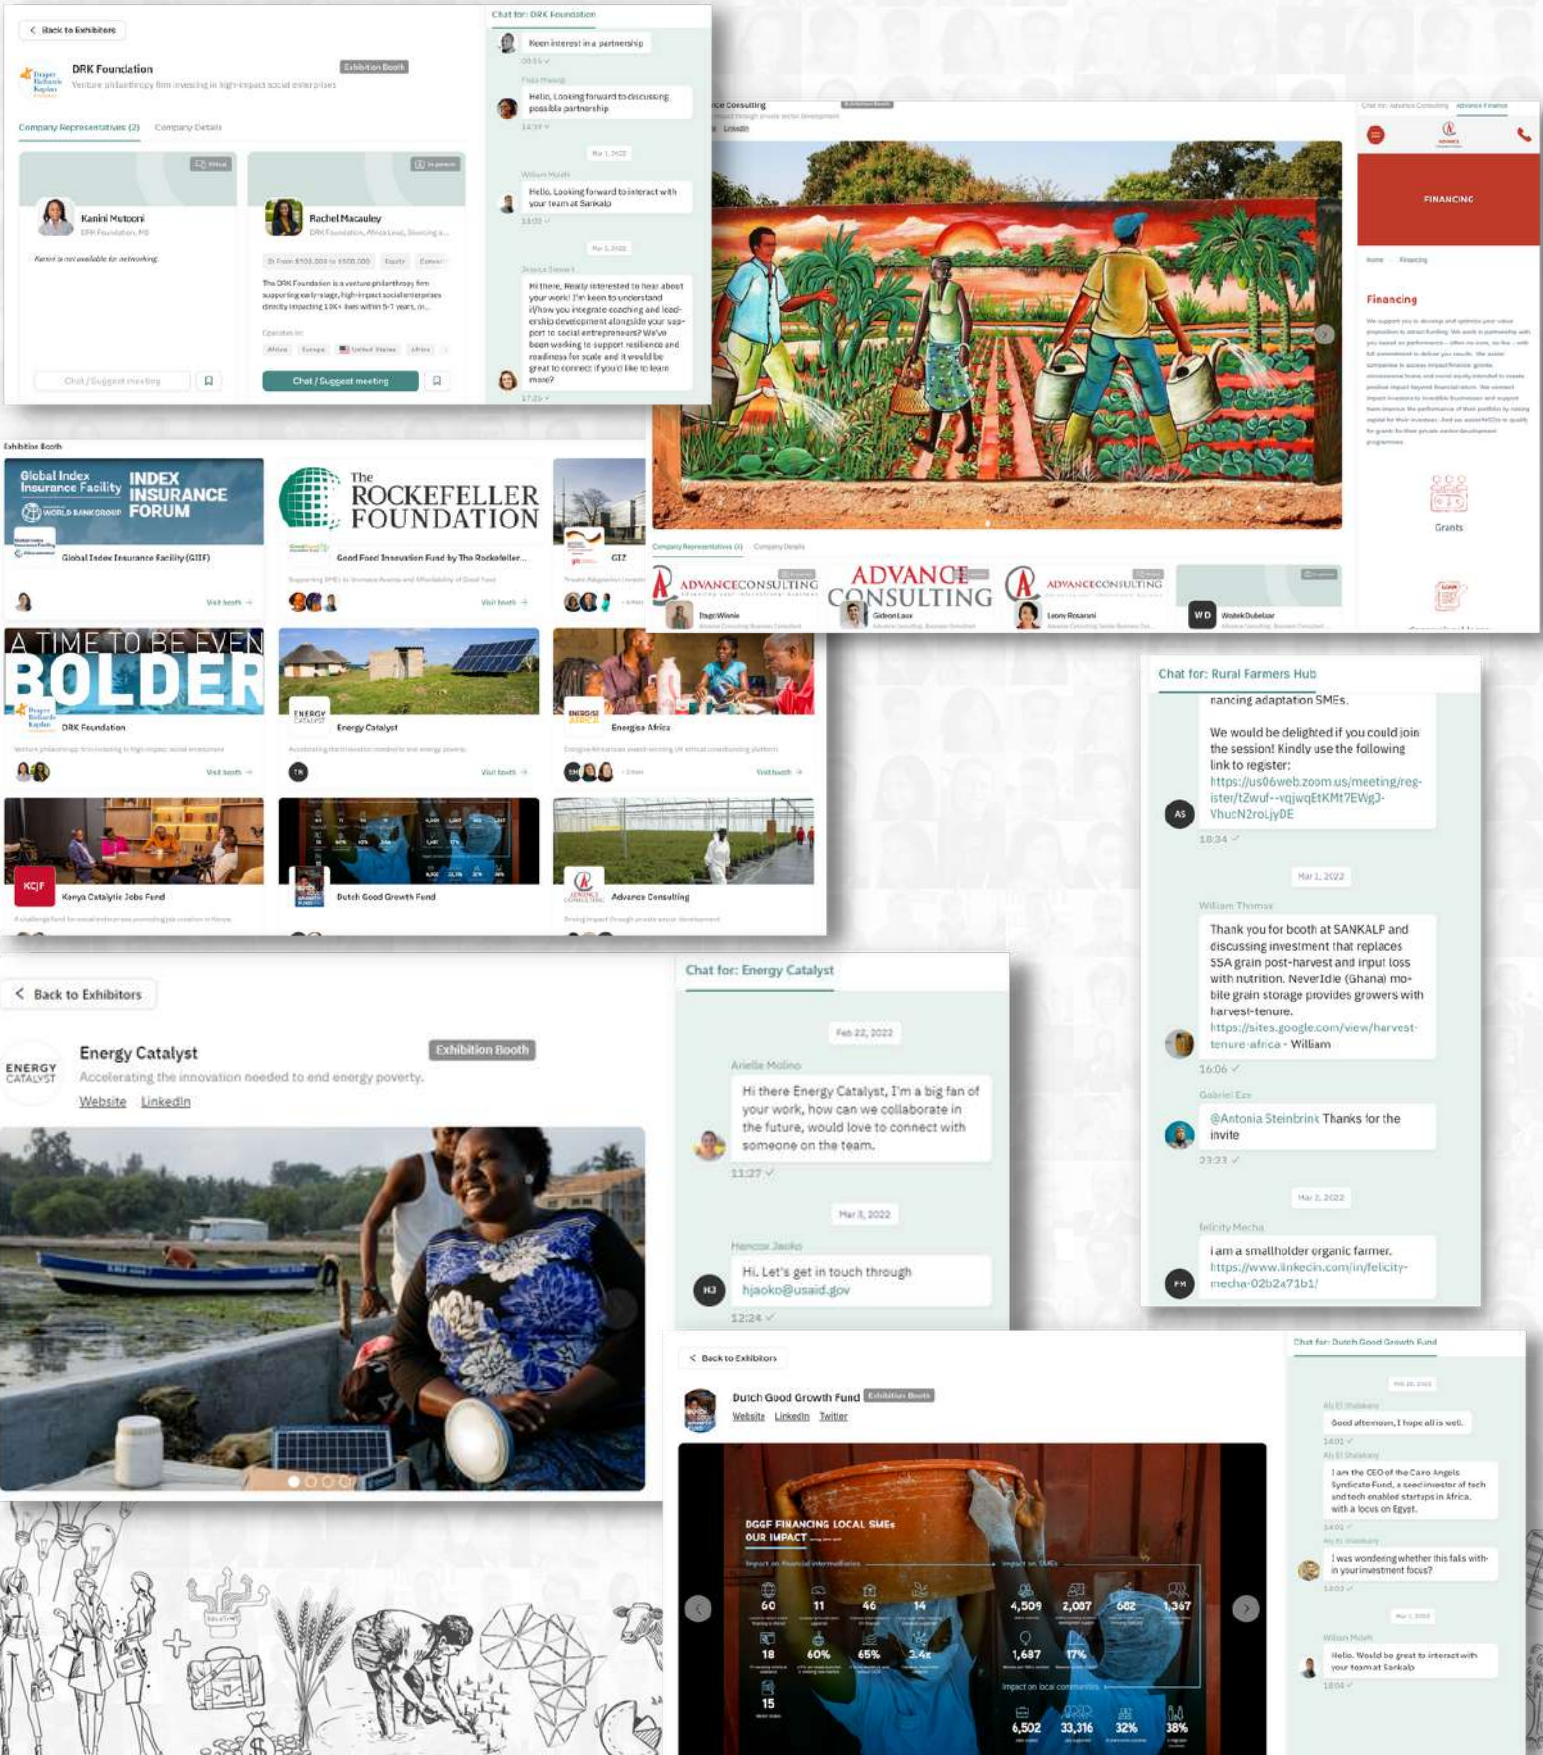

There is a need for building capacity for all stakeholders including indigenous and local communities by reaching out through a bottom-up approach in terms of awareness of opportunities and better information available on the implications of projects. There is also a need to also introduce activities that cover both Ocean and land for example seaweed farming. Bigger policy changes to find alternative solutions in energy for example solar and wind to help limit fossil fuels and adoption of smart technologies for better environmental sustainability.

We, therefore, need to bring the different sectors together as we are interconnected and one action produces a ripple effect throughout the ecosystem.

VIRTUAL EXHIBITION SPACE

The Sankalp Africa Summit 2022 had a total of 46 virtual exhibition booths, representing partners, entrepreneurs, and programmatic initiatives.

The collage displays several virtual exhibition booths and chat windows:

- DRK Foundation:** A booth for a venture philanthropy firm investing in high-impact social enterprises. It features a profile picture of Kanini Mutoro and Rachel Macaulay, along with a 'Chat / Suggest meeting' button.
- Chat for: DRK Foundation:** A chat window showing a conversation between a visitor and a representative. The visitor expresses interest in a partnership, and the representative responds positively.
- Global Index Insurance Facility (GIIF):** A booth for the World Bank Group, featuring a 'Visit booth' button.
- The Rockefeller Foundation:** A booth for the Good Food Innovation Fund, featuring a 'Visit booth' button.
- ADVANCE CONSULTING:** A booth for a consulting firm, featuring a 'Visit booth' button.
- Energy Catalyst:** A booth for a company accelerating innovation to end energy poverty, featuring a 'Visit booth' button.
- Energy Africa:** A booth for a company providing energy solutions, featuring a 'Visit booth' button.
- Kenya Catalytic Job Fund:** A booth for a challenge fund for small and micro-enterprises, featuring a 'Visit booth' button.
- Dutch Good Growth Fund:** A booth for a fund supporting local SMEs, featuring a 'Visit booth' button.
- Chat for: Energy Catalyst:** A chat window showing a conversation between a visitor and a representative. The visitor expresses interest in collaborating, and the representative responds positively.
- Chat for: Rural Farmers Hub:** A chat window showing a conversation between a visitor and a representative. The visitor expresses interest in joining a session, and the representative provides a link to register.
- Chat for: Dutch Good Growth Fund:** A chat window showing a conversation between a visitor and a representative. The visitor expresses interest in discussing investment, and the representative responds positively.
- Energy Catalyst Booth:** A detailed view of the Energy Catalyst booth, featuring a large image of a woman in a boat and a 'Visit booth' button.
- Dutch Good Growth Fund Booth:** A detailed view of the Dutch Good Growth Fund booth, featuring a large image of a woman holding a basket and a 'Visit booth' button.
- Impact Dashboard:** A dashboard showing the impact of the Dutch Good Growth Fund, with various metrics and charts.

UNCONFERENCE AGENDA

For the first time in Sankalp's history, we introduced an unconference style agenda during the in-person day of the Africa Summit 2022. All in-person ticket holders were invited to contribute to the agenda on a public Mural board that we created. Two outdoor discussion zones were dedicated spaces to host the unconference agenda. There were no limitations on what individuals could contribute, but there were not microphones, powerpoint presentations, or stages -- just good old fashioned in-person sharing of insights, discussing challenges, and surfacing opportunities.

NETWORKING COCKTAILS

On Thursday, March 4th, Sankalp hosted networking cocktails to mark the opening of the in-person component of the Sankalp Africa Summit 2022. We were joined by over 50 ecosystem partners including global leaders, heads of businesses and key investors for cocktails, conversations, and renewed partnerships towards catalysing the entrepreneurship ecosystem to solve global challenges sustainably. Everyone was delighted to finally meet again in person after nearly a two-year hiatus of in-person convening.

PARTNER-LED EVENTS

#SankalpAfrica2022

JHPIEGO DESIGN SPRINT: UNLEASHING THE POWER OF CONNECTIVITY FOR HEALTH FACILITIES

Jhpiego hosted an in-person design sprint centered around the challenge statement, “How might we ensure digital connectivity and necessary infrastructure to allow digital/tech-enabled solutions to help improve health outcomes?” Hosted on March 4th, the objective of the half day design sprint was to create novel partnership models between multiple sectors, including telecommunication companies, entrepreneurs, health facility administrators, and other stakeholders that leads to the development of digital infrastructure necessary for reliable connectivity within health facilities in rural and peri-urban areas of Kenya.

AFRICA AGTECH & INCLUSIVE INSURANCE CHALLENGE

Powered by Sankalp Forum, the Africa AgTech & Inclusive Insurance Challenge aimed to celebrate and support young entrepreneurs who are working at the intersection of agriculture, insurance, climate, and gender to build resilience for rural populations. The Africa AgTech & Inclusive Insurance Challenge offered an opportunity to the most promising enterprises to win various awards for a total of \$50,000 USD across three categories (Data & Analytics, Agricultural Productivity, and Financial Inclusion for Ag). Through participating in the Sankalp Africa Summit 2022, the top innovators are expected to gain exposure on investment readiness, network with potential impact investors and improve their business models. Collectively, this will make their innovations more competitive in future funding rounds.

Each of the 3 winners is helping solve complex social challenges through cutting edge innovations and high potential entrepreneurship, and each of them have shown ability to scale, disrupt and transform the sectors with their promising ideas.

The Sankalp Forum hosted an outdoor cocktail hour the evening before the Summit's in-person programming began. The cocktail took place on March 4th from 6pm onwards, and attendees included investors, entrepreneur support organizations, and other Summit partners. We presented the Challenge program winners during the cocktail hour.
